FRENCH ROMAN HYACINTHS

A charming and distinct class of hyacinths, extensively
grown by florists for winter cut flowers. They force readily
in the house, but are not recommended for outdoor planting.
Each bulb gives three or four graceful flower spikes, and by
successive planting they can be had in flower from November to
March. The delightfully fragrant flowers are more slender
and smaller than the ordinary hyacinth, but are considerably
earlier. The best effect is produced by planting four or five
bulbs in a medium-sized pot.

10c. each; \$1.00 doz.; \$8.00, 100;

M & S PARROT OR DRAGON TULIPS

Parrot Tulips do not receive the
attention they deserve. They like
a light, sandy soil, shallow plant-
ing and a sunny location.

Parrot Tulips belong to the late
or May flowering Tulips, and have
immense, attractive flowers of
singular and picturesque forms
and brilliant and varied colors.
The petals are curiously fringed
or cut, and the form of the flower,
especially before it opens, re-
sembles the neck of a parrot.

M & S BREEDER LATE TULIPS

Tulips Growing in Fibre.

The Breeders really form a distinct class by themselves, owing to their peculiar dull toned bronze colors. It is these odd colors which form one of the chief characteristics of the Breeders. Outside of that, most of them produce flowers with great lasting qualities and with a sweet agreeable fragrance.

Orange Beauty, golden orange, Doz., 70c., 100, \$4.50.

THE MADONNA LILY
LILIUM CANDIDUM

LILIUM CANDIDUM

(Madonna Lily)

Choice Northern-Grown

The favorite Lily of the old-fashioned
garden, produces strong, stiff stems,
studded with a mass of pure, glistening
white flowers, that enliven the perennial
flower-garden or, for contrast with the
beautiful green shrubs of the June gar-
den, are unequaled, frequently growing
4½ feet high.

Plant some bulbs during September
and October and enjoy a oig crop of
flowers next June; or pot up, store in
coldframe and force for early winter in
the greenhouse or conservatory. Our
bulbs of this splendid Lily are grown
in northern France, and are of the true
thick-petaled variety, which is much
superior in habit and flowering quali-
ties to that of the cheap, loose, southern
grown bulbs.

Extra Large Bulbs 20c. each \$2.00 Doz.

LILY BULBS FOR INDOOR GROWING

LILIUM HARRISH

(Bermuda Easter Lily)

This is undoubtedly the best Lily for winter forcing, as it
comes quickly into bloom. The flowers are trumpet-shaped,
pure white, and delightfully fragrant. The freedom with
which the flowers are produced is truly remarkable.

Fine bulbs, 6 to 7 inches, 25 cts. each; \$2.75 per doz.
Extra bulbs, 7 to 9 inches, 40 cts. each; \$3.50 per doz.

M & S Calla or
Lily of the Nile.

CALLA LILIES

These like a stiff, clayey soil with a
small quantity of shredded cow-manure.
Bulbs should be set with the crown, or
top, protruding just above the surface.
When in growing condition, warm water
given several times during the week will
hasten the flowering period and increase
the number of blooms. When using the
large-sized bulbs, plant but one in a pot;
smaller ones, two. We call especial at-
tention to the Yellow Calla, which is one of
the grandest varieties in cultivation, and
most valuable for house or conservatory
decoration. Plant Callas indoors only in
the fall of the year.

FREESIA

This is one of the most
beautiful of all Cape bulbs,
possessing peculiar grace of
form; and its fragrance is
most delightful, one pot of a
dozen bulbs being sufficient to
perfume a whole house. As
cut flowers they are extremely
valuable; the unexpanded
blossoms opening in water, fill
the air with the most delicate
perfume, and their endurance
is really remarkable.

Improved Purity. The finest
and purest white variety yet
introduced; of strong growth
and with very large flowers.

M & S CHOICE PAEONIES

Double Paeonies are too well known to require description. Their present popularity is due to the great improvement in them in recent years, their easy culture, the handsome appearance of the plant, and the brilliant and striking effect of their massive, finely formed and richly colored flowers. The attention given to them, in Europe and America, has resulted in the production of many notably fine new varieties. Among hardy, herbaceous perennials, the Chinese Paeonies rank about first for lawn or

- flower-border, or shrubbery decoration. They are all hardy.

 - Rosea—Beautiful pink. 30c. each; \$3.25 doz.
 - Rubra—Bright red. 30c. each; \$3.25 doz.
 - Extra large clumps of any of the above, 50c. each; \$5.00 doz.

SPANISH IRIS

These exquisite and dainty flowers may be justly termed the "poor man's orchid," as the colorings and markings are scarcely surpassed by that noble genus. The flowers are exceedingly graceful, of large size, frequently 4 to 5 inches across, and are borne on stems 24 inches tall. Few, if any, of the Irises lend themselves to more artistic arrangement as a cut-flower for the drawingroom or the dinner-table.

They may be planted in pots and stored in coldframes overwinter, and forced into bloom during March. They are seen to the best advantage if arranged in masses of the different colors, all of which combine splendidly, in borders or beds. Plant bulbs 3 to 4 inches deep, and the same distance apart. Sharp builders' sand, to the depth of 1 inch beneath base of the bulbs will amply repay by more luxurious spikes and larger flowers. A situation well open to the sun suits them best, and, like all bulbous Irises offered, a slight mulch will prove beneficial.

- Hartz. Standards Purple-blue, flaked lilac.
- Cajanus. Rich golden yellow.
- Der Kinderen. Standards blue, with yellow falls.
- King of the Whites. Large; pure white.

AMARYLLIS (Hippeastrum)

The Amaryllis is pre-eminently a window-garden plant for the amateur, producing under the simplest conditions gorgeous trumpet-shaped blooms.

American Hybrids. In offering this selection of seedlings we believe that they are the best obtainable at the present time, and we know of nothing that we can recommend that will give the amateur greater pleasure for his window garden. They embody, with vigorous growth, free-flowering habit and enormous size of the individual flowers, a really wonderful range of colors, varying from deep crimson to bright orange-scarlet, and from light rose to almost pure white, many of them beautiful combinations in stripes and variegations. Mixed varieties only in very strong bulbs. 75 cts. each;

Formosissima (Jacoboean Lily). Brilliant crimson, free and early, 25 cts. each;

JAPANESE IRIS (Ready in October).

Japanese Iris

The King of all Iris, covering a wide range of color. Named sorts can be selected to cover a flowering period of five weeks, from the middle of June into July. The flowers, when spread, measures 12 inches across. While they succeed generally in all soils, they delight and thrive best in deep, rich location.

30c. each. doz., \$3.00;

GERMAN IRIS

This is the popular "Flag Iris" thriving best in a high, dry soil; when planting observe that the growing part of the crown protrudes from the soil, and only when established should this be covered entirely. More effective when planted in masses either in the hardy border in front of shrubbery or in beds.

30c. apiece; \$3.00 a dozen.

LILY OF THE VALLEY

one of the most beautiful and admired spring flowering plants. For indoors it forces quickly. Planted outdoors they increase from year to year. Ready in December.
